THE ULTIMATE BROW MAPPING CHEAT SHEET

Your eyebrows shape your entire face. Whether you're filling, tweezing, or microblading, brow mapping ensures your brows are symmetrical, flattering, and perfectly balanced. This cheat sheet will guide you through the Golden Ratio method and help you achieve your best brows ever!

Step

01

Understanding the Golden Ratio for Brows

The Golden Ratio (1:1.618) is the secret formula for achieving perfectly proportioned brows based on your unique facial structure.

Brow Mapping Key Points:

- 1 Start Point:** Align the middle of your nostril with the inner corner of your eye—this is where your brow should begin.
 - 2 Arch Placement:** Align the tip of your nose with the center of your iris—this is where your arch should peak.
 - 3 End Point:** Draw a line from the outer nostril through the outer corner of the eye—this is where your brow should end.
- ◆ **Pro Tip:** Use a brow mapping pencil, string, or a ruler to lightly mark these key points before shaping.

Step

02

Choosing the Right Brow Shape for Your Face

Your face shape determines the most flattering brow shape for you. Use this guide to find your perfect match!

- ✓ **Oval Face** → Soft, natural arch (lucky you—most shapes suit you!)
- ✓ **Round Face** → High, defined arch to add length and dimension.
- ✓ **Square Face** → Soft, curved brows to balance a strong jawline.
- ✓ **Heart-Shaped Face** → Rounded arch to soften a prominent forehead & pointed chin.
- ✓ **Long Face** → Flat, straight brows to create the illusion of width.
- ✓ **Diamond Face** → Softly curved brows to enhance symmetry.
- ◆ **Pro Tip:** Your natural brow shape is a great starting point—work with what you have!

Step 03

The 5-Step Brow Mapping Process

Follow these simple steps to map your brows like a pro!

- ✓ **Step 1: Identify the Start, Arch, and End points using the Golden Ratio (Mark them lightly with a brow pencil).**
- ✓ **Step 2: Connect the points with thin, natural strokes to outline your ideal brow shape.**
- ✓ **Step 3: Check symmetry using a brow ruler or caliper (measure both brows to match them evenly).**
- ✓ **Step 4: Remove stray hairs below the outline (tweeze or trim carefully—less is more!).**
- ✓ **Step 5: Fill in sparse areas using brow pencil or pomade, then blend with a spoolie for a soft, natural look.**
- ◆ **Pro Tip: Always step back and check from a distance before making final tweaks!**

Step

04

Fixing Uneven Brows – Quick Corrections

No one's face is perfectly symmetrical, and that's okay!

Here's how to fix common brow issues:

- ✓ One brow is higher? → Lower the arch slightly on the higher brow and fill in the lower one.
- ✓ One brow is straighter? → Gently arch the straighter brow while softening the arched one.
- ✓ Brows too far apart? → Fill in slightly inward for balance.
- ✓ Brows too close together? → Tweeze lightly at the inner corners for a more open look.
- ◆ Pro Tip: Your brows are sisters, not twins—aim for balance, not perfection!

Brow Mapping Toolkit – Must-Have Supplies

For precise results, these tools will make brow mapping easy & professional:

- ✓ **Brow Mapping Pencil** – Ideal for marking key points.
- ✓ **Brow Mapping String (Pre-Inked)** – Creates crisp guidelines.
- ✓ **Golden Ratio Ruler or Caliper** – Ensures symmetry.
- ✓ **Spoolie Brush** – Helps blend product for a natural finish.
- ✓ **Brow Gel or Pomade** – Locks brows in place.
- ✓ **Angled Brush & Concealer** – Cleans up edges for a defined look.

Final Brow Shaping Tips for a Flawless Look

- ✓ Always map before tweezing—avoid over-plucking!
- ✓ Trim long hairs instead of tweezing to maintain natural fullness.
- ✓ Use a light hand when filling in—build color gradually for a natural effect.
- ✓ Set with brow gel to keep everything in place all day.
